

# ELECTING A CANDIDATE IN ELECTION

## ABSTRACT

In this voting system cast vote, count, and display the votes for each candidate that participates in elections using C language. by using the online voting system the election officers can easily count the vote and release result faster. This will consist of upload and check electing voting group of people who are voting it will save the count in system. If we enter 1: then the list of candidates is displayed and the user can now choose from this list of candidates. NEXT, If we enter (1-4): then the list of candidates will be displayed. If we enter 2: it shows the vote count. An **electoral system** or **voting system** is a set of rules that determine how elections and referendums are conducted and how their results are determined.
